| Turnbuckle, 3/8" Herreshoff Pattern | HM9335 | 144.00 |

* Mast Hoops are fastened with copper rivets and sealed with one coat of varnish.

** Standing Rigging (stays) are supplied with appropriate loops spliced into upper ends. The loops are served with marlin and oversewn with Elk Hide. All rigging is supplied extra long so that they may be cut to the proper length and leaded into the Herreshoff Turnbuckles.

Patterns for many of the above fittings were made with the assistance of the Cape Cod Shipbuilding Co, The Herreshoff Marine Museum, Mystic Seaport, and from Herreshoff Mfg. Co. Inc. plans 76-118B & 76-118C dated 2-23-38.

NB The Herreshoff 12 1/2 was designed in 1914 as a sail training boat for youngsters. As such it was supplied with 1/4" sheets and halyards. Adults often find that when they use the boat they prefer the "feel" of a larger diameter line in their hands. The HM0021 block listed above which was original equipment on the Herreshoff 12 1/2 is made for 1/4" line. When using a larger diameter line it is recommended that the HM0005 block be substituted. This block is available in all the same configurations as the HM0021 block.
